Summary

Passion-driven, Self-motivated, Hardworking and Self-taught software developer with proven coding experience, seeking to use my programming expertise for developing and maintaining quality software products and keep an eye on the wellness and improvement of existing projects.

I can handle projects ranging from frontend development to backend services using Javascript and Python as my tools of service.

I believe in the continuous learning and the power of team-work and can work with or without supervision.

Technical Skills

Front-End: Graphic Design, UI/UX Design, CSS, VUEJS, REACTJS.

Back-End: Python { VanillaPython, Django, Flask }, Javascript { ExpressJS, Ajax, Mongoose}.

Database Server: MySQL, MongoDB.

API Specs: REST.

Experience

Programming tutor at Clik Networks, 2016.

I taught Wordpress and C# to new interns.

Projects

Completed Projects

GradeKulator, 2016.

A cumulative grade point average calculator developed using C#.NET, the project was developed to automate the calculation of student CGPA at Federal Polytechnic Ede, Osun.

Coinverter, 2018.

A single page web application developed as a real project while learning VUEJS. It is a SPA that is capable of converting over 100 crypto-currencies to Nigeria FIAT in real-time.

<https://www.coinverter.tk>

Ongoing Projects

HRIS, 2019.

A django based Human Resource Information System.

CHMS, 2019

An ExpressJS Based Church Management System.

Education

Federal Polytechnic Ede HND (Computer Science)	2018–2019
---	-----------

Federal Polytechnic Ede ND (Computer Science)	2013–2015
